**Note:** A value in "Medicare Fees" does not necessarily indicate payment. Scroll down to see Medicare's status on the code for coverage specifics. Medicare has assigned relative value units (RVUs) to codes the agency does not cover to allow payers that follow the resource based relative value system to have an agreed upon valuation rate.

**Code Status A**

**A** = Active Code. These codes are paid separately under the physician fee schedule, if covered. There will be RVUs for codes with this status. The presence of an "A" indicator does not mean that Medicare has made a national coverage determination regarding the service; carriers remain responsible for coverage decisions in the absence of a national Medicare policy.

Radiology Diagnostic Tests : 99

**99** = Concept does not apply

PC/TC Indicator : 0

**0** = Physician Service Codes--Identifies codes that describe physician services. Examples include visits, consultations, and surgical procedures. The concept of PC/TC does not apply since physician services cannot be split into professional and technical components. Modifiers 26 and TC cannot be used with these codes. The RVUS include values for physician work, practice expense and malpractice expense. There are some codes with no work RVUs.

Endoscopic Base Code : None

### Modifier Guidelines

	Modifier	Rules(Click on rules for Details)
MULT PROC	51	Multiple procedure reduction applies
<p><b>51</b> = Multiple Procedures: When multiple procedures, other than E/M services, Physical Medicine and Rehabilitation services or provision of supplies (eg, vaccines), are performed at the same session by the same provider, the primary procedure or service may be reported as listed. The additional procedure(s) or service(s) may be identified by appending modifier 51 to the additional procedure or service code(s). Note: This modifier should not be appended to designated "add-on" codes</p> <p><b>2</b> = Standard payment adjustment rules for multiple procedures apply. If procedure is reported on the same day as another procedure with an indicator of 1, 2, or 3, rank the procedures by fee schedule amount and apply the appropriate reduction to this code (100%, 50%, 50%, 50%, 50% and by report). Base the payment on the lower of (a) the actual charge, or (b) the fee schedule amount reduced by the appropriate percentage.</p>		
BILAT SURG	50	No 150% bilateral payment boost
<p><b>50</b> = Bilateral Procedure: Unless otherwise identified in the listings, bilateral procedures that are performed at the same operative session, should be identified by adding modifier 50 to the appropriate five digit code.</p> <p><b>0</b> = 150% payment adjustment for bilateral procedures does not apply. If procedure is reported with modifier -50 or with modifiers RT and LT, base the payment for the two sides on the lower of: (a) the total actual charge for both sides or (b) 100% of the fee schedule amount for a single code.</p>		
ASST SURG	80	Assistant payment allowed when supported
<p><b>80</b> = Assistant Surgeon: Surgical assistant services may be identified by adding modifier 80 to the usual procedure number(s).</p> <p><b>0</b> = Payment restriction for assistants at surgery applies to this procedure unless supporting documentation is submitted to establish medical necessity.</p>		
CO-SURG	62	Co-surgeons not permitted

**62 = Two Surgeons:** When two surgeons work together as primary surgeons performing distinct part(s) of a procedure, each surgeon should report his/her distinct operative work by adding modifier 62 to the procedure code and any associated add-on code(s) for that procedure as long as both surgeons continue to work together as primary surgeons. Each surgeon should report the co-surgery once using the same procedure code. If additional procedure(s) (including add-on procedure(s) are performed during the same surgical session, separate code(s) may also be reported with modifier 62 added. Note: If a co-surgeon acts as an assistant in the performance of additional procedure(s) during the same surgical session, those services may be reported using separate procedure code(s) with modifier 80 or modifier 82 added, as appropriate.

**0** = Co-surgeons not permitted for this procedure.

TEAM SURG	66	Team surgeons not permitted
-----------	----	-----------------------------

**66 = Surgical Team:** Under some circumstances, highly complex procedures (requiring the concomitant services of several physicians, often of different specialties, plus other highly skilled, specially trained personnel, various types of complex equipment) are carried out under the "surgical team" concept. Such circumstances may be identified by each participating physician with the addition of modifier 66 to the basic procedure number used for reporting services.

**0** = Team surgeons not permitted for this procedure.

MINIMUM ASST SURG	81	Assistant payment allowed when supported.
-------------------	----	---

**81 = Minimum Assistant Surgeon:** Minimum surgical assistant services are identified by adding modifier 81 to the usual procedure number.

**0** = Payment restriction for assistants at surgery applies to this procedure unless supporting documentation is submitted to establish medical necessity.

ASST SURG (QUALIFIED RESI. NA)	82	Assistant payment allowed when supported.
--------------------------------	----	---

**82 = Assistant Surgeon (when qualified resident surgeon not available):** The unavailability of a qualified resident surgeon is a prerequisite for use of modifier 82 appended to the usual procedure code number(s)

**0** = Payment restriction for assistants at surgery applies to this procedure unless supporting documentation is submitted to establish medical necessity.

PHYSICIAN SUPERVISION	*PS	Concept does not apply.

### Medically Unlikely Edits

**Source:** 2019 Medically Unlikely Edits (MUE)  
**Publisher:** CMS  
**Date:** July 01, 2019

Services	MUE	MAI	MUE Rationale
<b>Practitioner Services</b>	1	2	Anatomic Consideration
<b>DME Supplier Services</b>	NA	NA	NA
<b>Facility Outpatient Services</b>	1	2	Anatomic Consideration

**MAI 1: Line Edit**

MUE MAI "1" indicates a claim line edit. When it's appropriate to report units that exceed the MUE, use one or more additional claim lines with an appropriate modifier appended to the code. Payers who apply the MUE will process each claim line separately for payment.

**MAI 2: Date of Service Edit: Policy**

MUE MAI "2" indicates an absolute date of service (DOS) edit based on policy. Payers who apply the MUE sum the code's same-DOS units (not counting lines with modifier 55). If the sum exceeds the MUE value, the payer will deny same-DOS lines with that code on the current claim. CMS has not identified any instances in which exceeding an MAI 2 MUE is correct.

**MAI 3: Date of Service Edit: Clinical**

MUE MAI "3" indicates a date of service (DOS) edit based on clinical benchmarks. Payers who apply the MUE sum the code's same-DOS units (not counting lines with modifier 55). If the sum exceeds the MUE value, the payer will deny same-DOS lines with that code on the current claim. MACs may pay excess units upon appeal or may bypass the MUE based on documentation of medical necessity.

## CPT® Lay Terms

In this procedure, the provider fits the patient with a diaphragm or cervical cap and educates the patient on self-insertion. The purpose of a diaphragm is to prevent sperm from entering the uterus during intercourse to prevent pregnancy. The purpose of the cervical cap is for collecting menstrual flow or to assist in artificial insemination. The cervical cap is not a contraceptive.

## Clinical Responsibility

For a diaphragm fitting, the provider inserts a fitting ring into the vagina and covers the opening to the uterus. The largest ring that fits comfortably is usually the one the provider chooses. Different types and sizes of diaphragms are available. A cervical cap is usually fitted to prevent pregnancy; it blocks most sperm from entering the uterus. The provider educates the patient on the proper type and size of diaphragm or cervical cap and provides instructions of how to insert and position the device on her own. Instructions for the diaphragm may include that spermicidal cream or jelly should be used with the diaphragm.

## Terminology

**Cervical cap:** A soft rubber cap with a rim that fits around the cervix.

**Cervix:** Smaller portion of the uterus that juts into the vaginal canal and consists of three areas: the external os opens into the vagina, called the ectocervix, the transformation zone lies just inside the os, and the endocervix, which lies just below the internal os, or opening, into the body of the uterus.

**Diaphragm:** A soft latex or silicone dome with a spring molded into the rim, which creates a seal against the walls of the vagina.
